

Monitor Risers

Ergonomic Tools

Enwork Monitor Risers create valuable space right where it's needed. Benching workstations improve real estate efficiencies, sometimes at the expense of personalization and employee effectiveness. By elevating monitors, these Risers increase usable worksurface area up to 20% in a typical 30" x 72" benching workstation. Even better, the nearly four inch rise puts monitors in a more ergonomic, line-of-sight position for reduced neck and back strain.

- Provides up to 20% increase of usable worksurface
- Raises monitors approximately 4" to a more ergonomic, line-of-sight position
- 7-gauge steel construction for stability and durability
- 11"D Single (28"W) or Dual (39"W) monitor sizes
- 5 standard paint options
