DESIGN FIRM
Multiple (Nationally Recognized)

Enwork Studio was approached by a major aligned dealership to provide a needs based solution within a specific budget. After conducting several occupant usage studies and white-board sessions, the project team identified a variety of height-adjustable tables, custom bases with low profile offset C-legs, custom wire management troughs and CPU holders, and custom 120-degree work surfaces. The product's color palette and sizing was refined to fit perfectly within existing systems furniture.

PRODUCT MIX

- Custom programmable height adjustable tables (3 stage)
 - various shapes and sizes
