

Tesla Motor Company

LOCATION

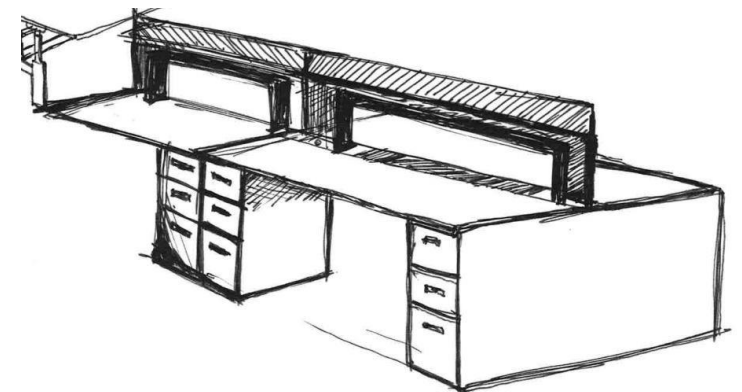

International; Palo Alto Based

DESIGN FIRM

MBH Architects; Tesla Workplace

Interiors at Tesla Motors have evolved significantly from their start-up days using IKEA tables and refurbished products. As the company grew so did their need for highly functional, technology friendly, and ergonomically correct furniture products. Oh, and the products had to look the part of a Tesla-branded workspace. The Enwork Studio team collaborated with Tesla Workplace and MBH Architects to design desk and storage that utilized innovative materials and construction methods to achieve the ideal design aesthetic and functionality. The final design uses power-coated metal cabinet construction and thermos-foil wrapped components to create a seamless look. All technology and electric height-adjustable components are hidden and fully integrated within the product.

PRODUCT MIX

- Height Adjustable linked desking
- Media sharing collaboration tables
- Conference Tables
- Training Tables
