

Monitor Arm

Single-Monitor Applications

Enwork's new monitor arm is designed with intuitive adjustability to combat the neck and eye strain as well as the shoulder and back pain caused by improperly positioned computer screens. In addition to the ergonomic benefits, users will appreciate built-in cable management, and dual USB connections at the worksurface. With an Enwork monitor arm, you get impressive functionality and quality construction at a surprisingly affordable price point.

- Contemporary design with aircraft grade aluminum arm and an anti-scratch silver powder coat finish
- Two USB ports provide power/data connections at the worksurface
- Easy access cable management system routes cords beneath the monitor arm
- Adjustable pneumatic spring hovering system provides 4.4-19.8 lbs load capacity
- Force regulating system with torque control valves for easy adjustment
- Monitor mounting bracket tilts and swivels for exact positioning with landscape or portrait viewing
 - 85° upward and 15° downward tilt range
 - +/- 90° swivel angle
- 24" maximum reach, optimal for deeper desktops and corner applications
- Multiple mounting options for worksurfaces 3/4" - 3-1/2" thick
 - Edge clamp mount
 - Grommet mount
 - Through-worksurface mount (5/16" - 2-3/4" hole)
- Base mounts off-center to maximize usable worksurface area
- Fits most monitors 10" – 27" diag. with VESA mounts 100x100 or 75x75 for quick installation
- Includes monitor mount and installation hardware
- 5 year limited warranty
