

Avant™

Patent Pending

Architectural Height-Adjustable Benching Environments

Avant is the future of integrated, height-adjustable benching environments. An entirely new design concept, Avant restores the function and convenience of traditional workstations within the dense footprint of modern benching. Optional 4" storage tops keep active documents right at your fingertips and integrates technology while providing the health benefits of a sit/stand environment.

Avant's anchored storage bases express a substantial, contemporary statement. The clean aesthetic fully conceals the moving leg mechanisms, power system components, and cabling of modern workspaces.

Structure your environment with Avant.

- 4" Storage Top with drawers or 1-1/4" top with trough available
- Sit/Stand electric height-adjustability (range of 28" - 47" H)
- Individual Bosch® motor for each leg assures smooth operation and long life
- Customizable with selection of laminates and contour laminates
- Single-Sided and Double-Sided Linear applications available 30"D, 60" or 72"W
